1 INTRODUCTION

This document provides the requirements to interoperate with TOMTEC-ARENA TTA2 using the Health Level Seven (HL7) standard.

Objective of this document is to provide a standard set of HIS/CIS/RIS requirements to effectively support and connect to TOMTEC-ARENA TTA2.

This chapter provides general information about the purpose, scope and contents of the HL7 Interface Specification.

1.1 INTENDED AUDIENCE

The user of this document is involved with system integration and/or software design. We assume that the reader is familiar with the terminology and concepts that are used in HL7 V2 standard and the IHE technical framework. Readers not familiar with HL7 terminology should first read the appropriate parts of the HL7 standard itself, prior to reading this conformance statement.

Although the use of this conformance statement in conjunction with the HL7 standard is intended to facilitate communication with TOMTEC-ARENA, it is not sufficient to guarantee, by itself the inter-operation of the connection between TOMTEC-ARENA and the 3rd party HL7-based system.

The integration of any device into a system of interconnected devices goes beyond the scope of the HL7 standard and this conformance statement when interoperability is desired. The responsibility for analyzing the applications requirements and developing a solution that integrates the TOMTEC equipment with other vendors' systems is the user's responsibility.

1.2 STANDARD VERSION SUPPORT

By default, TOMTEC-ARENA supports HL7 standard in version 2.3.1 In general, TOMTEC-ARENA is capable to be configured supporting higher versions of V2. In such cases contact the TOMTEC service for further advice.

1.3 ACRONYMS AND ABBREVIATIONS

The following acronyms and abbreviations are used in this document:

ADT	Admission, Discharge, and Transfer Message
EVN	Event Type Segment
HL7	Health Level 7
IHE	Integrating the Healthcare Enterprise
DICOM	Digital Imaging and Communication in Medicine
MRG	Merge Segment
MSH	Message Header Segment
OBR	Observation Request Segment
OBX	Observation Result Segment
ORC	Common Order Segment
ORM	Order Request Message
ORU	Observation Results - Unsolicited Message
PDF	Portable Document Format
PID	Patient Identification Segment
PV1	Patient Visit 1 Segment
TXA	Transcription Document Header Segment
MDM	Medical Document Management Message

2 MESSAGE SPECIFICATION

2.1 INBOUND MESSAGES

The TOMTEC-ARENA TTA2 performs the creation, the update or the deletion of information for patient, visit and examination information stored in the TTA database.

The TOMTEC-ARENA TTA2 stores the links between patient, visits and planned examinations which are later being linked to DICOM studies.

2.1.1 Supported Trigger Events

2.1.1.1 ADT Messages

Event Code	Description	Inbound Supported
ADT^A01	Admit/visit notification	Yes
ADT^A04	Register a patient	Yes
ADT^A05	Pre-admit a patient	Yes
ADT^A08	Update patient information	Yes
ADT^O40	Merge patient – patient identifier list	Yes

It is possible to configure additional ADT trigger events to establish create, update or merge patient's functionality as described above.

2.1.1.2 ORM Messages

Event Code	Description	Inbound Supported
ORM^001	Order message	Yes

Control Code	Description	Inbound Supported
NW	New order	Yes
XO	Change order request	Yes
SC	Status changed	Yes
DC	Discontinue order request	Yes

It is possible to configure additional control codes to establish create, update or terminate order functionality as described above.

2.1.2 Escaping

Character	Description	Inbound Supported
\Cxx\y\	Single-byte character set escape sequence with two hexadecimal values not converted	No
\E\	Escape character converted to escape character (e.g. '\')	Yes
\F\	Field separator converted to field separator character (e.g. ' ')	Yes
\H\	Start highlighting not converted	No
\Mxx\yyzz\	Multi-byte character set escape sequence with two or three hexadecimal values (zz is optional) not converted	No

\N\	Normal text (end highlighting) not converted	No
\R\	Repetition separator converted to repetition separator character (e.g. '~')	Yes
\S\	Component separator converted to component separator character (e.g. '^')	Yes
\T\	Subcomponent separator converted to subcomponent separator character (e.g. '&')	Yes
\Xdd..\ \	Hexadecimal data (dd must be hexadecimal characters) converted to the characters identified by each pair of digits	Yes
\Zdd..\ \	Locally defined escape sequence not converted	No
\.br\	Carriage return	No

2.1.3 Supported Attributes

SEQ	Element Name	Value Required (Yes / No)	Default Mapping (Yes / No)	Comment
1	Study Instance UID	No	Yes	

2.1.4 Configuration

Further information of the incoming HL7 messages, being full segments or individual fields, can be additionally stored associated to the patient, visit and study level. This stored information can be reused and added to any outbound message by configuration.

2.1.5 Examples

2.1.5.1 ADT^A01 Admit Patient/Visit

```
MSH|^~\&|HIS|HISFacility|TOMTEC-ARENA||20200911110137||ADT^A01|42|P|2.3||||ENG|8859/1|ENG|
EVN|A01|20200911110149|||
PID||P0001||Doe^John^^^|19010101|M|||||||||D|||
PV1|1|||||||V0001|||||||WL-KIS|||202104280800|||||
```

A patient record with the Patient ID P0001, John Doe (male) birthdate 01-01-1901 and a visit record with the visit ID V001 will be added to the TTA database. There is no action if the identical patient record or the visit record already exists. By default ADT^A04 and ADT^A05 messages are processed in the same way as described above.

2.1.5.2 ADT^A08 Update Patient

```
MSH|^~\&|HISApplication|HISFacility|TOMTEC-ARENA||20210911110211||ADT^A08|42|P|2.3||||ENG|8859/1|ENG|
EVN|A08|20210911110255|||
PID||P0001||Doe^Jane^^^|19080101|M|||||||||D|||
PV1|1|||||||V0001|||||||WL-KIS|||202104280800|||||
```

The name, the gender and the birthdate information of the patient record with the patient ID P0001 will be updated to Jane Doe (female) birthday 01-01-1908. If the record doesn't exist, Jane Doe will be created as a new record.

2.1.5.3 ADT^A40 Merge Patient

```
MSH|^~\&|HISApplication|HISFacility|TOMTEC-ARENA||20211010080545||ADT^A40|42|P|2.3||||ENG|8859/1|ENG||  
EVN|A40|20211010080551||||  
PID||P0001||Doe^John^^^|19010101|M|||||||||D|||  
PV1|1|||||||V0001|||||||WL-KIS|||202104280800|||||||  
MRG|P0002||||EMERGENCY329|
```

The visits and DICOM studies of the patients with the Patient ID EMERGENCY329 and P0001 will be merged to only one patient record with the Patient ID P0001. After this the empty patient record for Patient ID EMERGENCY00329 will be deleted.

2.1.5.4 ORM^O01 Order Message

```
MSH|^~\&|HISApplication|HISFacility|TOMTEC-ARENA||20200911110137||ORM^O01|42|P|2.3||||ENG|8859/1|ENG||  
PID||P0001||Doe^John^^^|19010101|M|||||||||D|||  
PV1|1|||||||V0001|||||||WL-KIS|||202104280800|||||||  
ORC|NW|O0001|A0001|||||||NW|||||||  
ZDS|1.2.826.0.1.3680043.9.6629.249636145320900.2020091111012182.19|
```

For the patient with the Patient ID P001 a new order and study record with the Study Instance UID 1.2.826.0.1.3680043.9.6629.249636145320900.2020091111012182.19 will be created.

If the Study Instance UID is not available in the message, a temporary one starting with the Root ID of TOMTEC (1.2.276.0.48) will be created and the DICOM Study will be associated to the HL7 order by Accession Number (default used from ORC.3) on arrival to TOMTEC-ARENA.

In addition, TOMTEC-ARENA TTA2 will update or delete existing orders. The supported control codes are XO for updating existing order information, SC for updating the order status and DC for discontinuing existing orders. Further details can be found in [section 2.1.1.2 ORM Messages](#).

2.2 OUTBOUND MESSAGES

The TOMTEC-ARENA TTA2 can be used to send ORU^R01 HL7 messages with the following contents:

- Reports (PDF) as an Base64 embedded document
- A link to a copy of the Report (PDF) in a shared folder
- A partial or a complete list of measurements
- Any information stored to TTA2 related to the patient, visit or study.
- Any information stored with the incoming ADT or ORM messages.

In default configuration the full report content including all measurements are transferred via ORU^R01.

The TOMTEC-ARENA TTA2 can be used to send MDM^T02 HL7 messages with the Reports (PDF) as an Base64 embedded document.

2.2.1 Supported Triggers

The TOMTEC-ARENA TTA2 supports the following reporting status triggers:

- Preliminary
- Finalized

The TOMTEC-ARENA TTA2 supports the following study status trigger:

- Analyzed

2.2.2 Supported Message Types

2.2.2.1 ORU

Event Code	Description	Outbound Supported
ORU^R01	Unsolicited transmission of an observation message	Yes

2.2.2.2 MDM

Event Code	Description	Outbound Supported
MDM^T02	Original document notification and content	Yes

2.2.3 Escaping

Character	Description	Outbound
\	Escape character	\E\
	Field separator	\F\
~	Repetition seperator	\R\
^	Component seperator	\S\
&	Subcomponent seperator	\T\

2.2.5 Configuration

2.2.5.1 PDF Reports

PDF Reports can also be send in an OBX segment of an ORU^001 message. The PDF can be embedded in the message or stored to a shared folder where only the link to the file is added to the HL7 message.

2.2.5.2 Measurements and Report Text

By default, all of the measurements and report text segments are added to the message, but it is possible to configure special measurements or text blocks to be added to the outbound message.
